

WiFi TV Voice Guide

The Arvig WiFi TV app version 1.14+ supports audible “talking” guides for customers with visual disabilities.

What the feature does on Amazon, Android and Apple devices:

- Channel and Program Selection - Allows the user to select channels and programs via channel up/down, physical numeric or on screen guides and menus.
- Display Channel/ Program Information - Allows the user to move focus state to read any text displayed within the app.
- Playback Functions - Allows the OS to read buttons so the user can control playback functions (ex. play, pause, rewind, fast forward, stop and record).

How To Enable the Talking Guide on Amazon Fire TV:

1. Go to the Home screen and select Settings
2. Select Accessibility
3. Select VoiceView option to On

How To Enable the Talking Guide on Android TV:

1. Go to the Home screen and select Settings
2. Select Accessibility
3. Select Talkback option to Enabled

How To Enable the Talking Guide on Apple TV:

1. Go to the Home screen and select Settings
2. Select General
3. Select Accessibility
4. Select VoiceOver option to On
